Projects

Canteen Management System | HTML, CSS, JavaScript

May 2025

- Developed a web-based Canteen Management System to manage food items, orders, and billing.
- Designed responsive user interfaces using HTML and CSS for smooth user experience.
- Implemented dynamic functionalities such as order selection and bill calculation using JavaScript
- Improved usability by organizing menu categories and real-time total price updates.

Travel Management System | HTML, CSS, JavaScript

September 2025

- Built a travel booking website to manage customer reservations and trip details.
- Implemented booking validation and fare calculation logic using JavaScript.
- Structured the application to ensure clean navigation and user-friendly experience.

Achievements

- Solving DSA Problems
- Active Github contributor
